Current position/affiliation: GIS Specialist

The Meaning of Geography to Me

To me, it's a gateway to study about the world itself.

Impact of iGeo Preparation on my Life

It helped me connect to people of similar interests around the world, and that the field encompasses multiple disciplines.

Ideas for Promoting Geography

I think using GIS to make infographics on daily lives to be a strong component in the promotion of geography - for instance, there are many real-time infographics and dashboards on water and electricity outage. Since everything has a spatial property, I believe that things that are related to our daily lives (finding directions on maps, looking at infographics etc.) visualized on the internet, accessibly, can help us understand how close geography is to life.
