Team: Indonesia

Participating Year(s): 2021

Current position/affiliation: Undergraduate psychology student at Universitas Indonesia / Assistant Lecturer at Tim Olimpiade Geografi Indonesia

The Meaning of Geography to Me

Geography means a lot to me. Started from my interest when studying countries in social subjects in elementary, then I joined the national geography olympiad to study geography thoroughly in high school. Geography gave me a new perspective of seeing the world, socially and physically. Exploring cultures, climate, morphology, and even human development made me explore lot of things.

Impact of iGeo Preparation on my Life

I gained a huge positive impact from the preparation and participation in iGeo. I met new friends with the same interest, gained new knowledge and discussion, knew how to manage my time well, and also knew how to prepare myself for international competition. It was impactful to me even in my college life right now.
