## The Meaning of Geography to Me

Geography is a life science that I want to use to protect the future.

## Impact of iGeo Preparation on my Life

The positive effects were great. I had the chance to acquire new knowledge of geography and improve my English level. Also, this will help as a great experience in future work with geography.

## Ideas for Promoting Geography

I would like to see more events like the International Geography Olympiad and include

students from a younger age group. I would also like to have the same in my country. In the future, I would like to publish a common geography book that everyone can understand, so that everyone can understand the world.

### **Suggestions for the iGeo**

First of all, thanks for the organization. Among my suggestions for IGeO, the first thing is that I would like this Olympiad to include more people. In addition, I would like to give an incentive certificate to the participants who did not get a medal but had high results. This is also in other international Olympiads. Thanks again for everything.
